

Refer the Sales Dataset (Answer as many questions as possible)

Dataset Link: https://drive.google.com/file/d/1lmUY_TVY0Mwhs1i4PwOclUobUL-7cVtV/view?usp=sharing

1. **Sales Analysis by Region:** Which region has the highest total sales?
2. **Profit Trends:** Which product categories and sub-categories are the most profitable?
3. **Discount Impact:** What is the relationship between discount rates and profit margins? (profit margin = Profit/sales)
4. **Shipping Mode Efficiency:** Which shipping mode is used most often, and how does it correlate with profits? (count of shipping mode, which ship mode is giving highest profit)
5. **Top Customers:** Who are the top 5 customers by total sales?
6. **Product Performance:** Identify the top 10 products by sales volume.
7. **Regional Profitability:** Which region has the lowest profitability, and what might be contributing to this? (find out which products are being sold highest in this region and whether these products have a high profit margin)
8. **Customer Segment Analysis:** Which customer segment based on City contributes the most to overall sales and profits?
9. **Loss Leaders:** Identify product categories with high sales but negative profits.
10. **Insights Dashboard:** Generate key insights from the dataset and create a comprehensive Excel dashboard to visualize them.
